PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer with a strong foundation in building RESTful APIs, authentication, and RBAC-based authorization using JavaScript, Express, MySQL, and Sequelize. Experienced across the stack, with front-end work in React and a proven record of delivering collaborative projects in fast-paced environments.

WORK EXPERIENCE

Dynamic Global Soft Inc. <i>Backend Developer Intern</i>	February 2026 – May 2026 Taytay, Rizal
- Analyzed and enhanced an existing backend boilerplate codebase, improving structure and middleware usage to streamline development processes. - Implemented CSRF protection, CORS configuration, and security headers using Helmet, significantly enhancing application security measures. - Designed and developed a secure password recovery flow, employing Nodemailer for email notifications and ensuring safe token-based reset mechanisms. - Constructed a Role-Based Access Control (RBAC) system with Sequelize, applying detailed permission middleware across user and file routes, covering 3+ user roles and 10+ endpoints, to enhance data security. - Developed a geographic search script to compile and validate barangay-level JSON data covering 1,600+ barangays, improving data accessibility and organization across multiple administrative levels.	

PROJECTS

D-Crypt Battle <i>Team Member</i>	2025 d-cryptbattle.org
- Collaborated in a team of four to develop an engaging web-based cryptography game, enhancing user engagement through interactive gameplay. - Designed the animations for the techniques section, clearly visualizing encryption and decryption processes to aid user understanding. - Utilized Babylon.js to create interactive elements, allowing users to explore cryptographic concepts in a fun and educational manner.	
ProxiShop (Frontend) Frontend Developer	2025 proxi-shop.vercel.app
- Developed a responsive e-commerce interface using React, optimizing user experience across product listing, detail, and cart functionalities. - Implemented a checkbox-based filtering system, enhancing product discoverability and improving overall user navigation. - Managed deployment via Vercel, planned backend integration for future iterations.	

EDUCATION

Taguig City University <i>Bachelor of Science in Computer Science</i>	June 2026 Taguig City, Metro Manila
